

FULLTHROTTLE

THE ULTIMATE CLOSED-LOOP MARKETING SOLUTION

On average, only 3% of your website visitors leave their contact information.

Stop missing out on the other 97%!

IDENTIFY

your unknown website visitors—first/last names and home and email addresses! Visual maps pinpoint *exactly* where they are visiting from.

MARKET

to them with *instantaneous* direct mail and email. Launch instant digital display, social, audio, and visual marketing to connect with shoppers across *all* household devices!

MEASURE

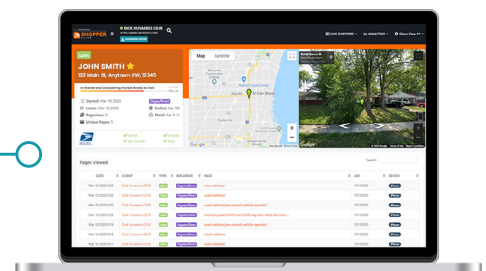

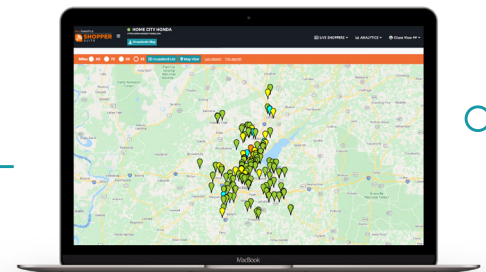

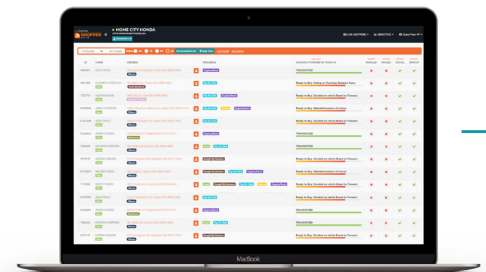

which marketing channels are working. You can track sales back to real customers and laser-focus on where to spend your marketing dollars.

HERE'S HOW IT WORKS:

1. When a shopper visits your website, they will be asked whether they would like to share their current location. If they opt in, their home and email addresses can be mined.
2. Within 24 to 48 hours, Shopper Suite will send direct mail pieces, mobile-responsive emails, display ads, and social media retargeting to identified households.
3. Shopper Suite will track how a customer interacts with your dealership, monitor how many shoppers have been mailed, and reveal potential opportunities for future mailings.

Build audiences from the people already browsing your services and re-activate website visitors who have yet to convert. With this next-level marketing solution, you'll connect the dots between marketing and sales and win big for your brand!
